Summary

Newfound Front-End Engineer interested in learning all aspects of the world of Computer Programming as well as UI/UX design. I'm a team player and people person who loves getting to know the company I work for as well as all employees within it. In my free time I'm probably re-watching The Simpsons, driving with the music up, or writing down songs/funny thoughts.

Experience

2017-07 - 2018-02

Web Developer
Collective Alternative
- Worked with account manager, creative director and content team to ensure website fits clients needs.
- Hosting and Domain Migration
- Launched websites and ran maintenance tests.
- Worked on SEO and google analytics

2015-06 - 2017-02

Scanning Tech, Operations Tech, Event Coordinator
Memory Ventures
- Scanned customers personal photos to the customers specifications.
- As an Ops Tech I received customer orders, placed on hold if further inquires were needed, and checked for quality of scans from scanning techs.
- Planned, organized, and participated in company events every 6 weeks.

2013-09 - 2016-05

Store Manager
Family Video
- Managed a team of 7. Looked for and interviewed, energetic and outgoing applicants.
- Managed store checkbook, ran store audits and ensured we had everything we needed to succeed each week.
- Built relationships with the customers and grew sales with movie sales, grassroots events and store games.

Education

The Iron Yard - Front End Engineering
- Worked closely with other students to complete daily homework. Paired Programming at times. Several group projects.
- Kept contact with team on slack to make sure we could ask questions and rely on one another for help.
- Learned the tech stack of the tech companies in the area to ensure learning what was most useful and beneficial.

2008-12 - 2014-12

Army Basic Training - National Guard
- Learned basic army skills needed to complete the objective.
- Worked as a team to accomplish goals.
- Memorized extensive information to progress as a soldier.
